AI_A2_2528159_TEST_LOG

Student: Hirwa Honorine
Registration Number: 25/28159
Verification Code: AI-A2-8159

Test Summary

The automated tests were executed using `pytest` to check the system's behavior.

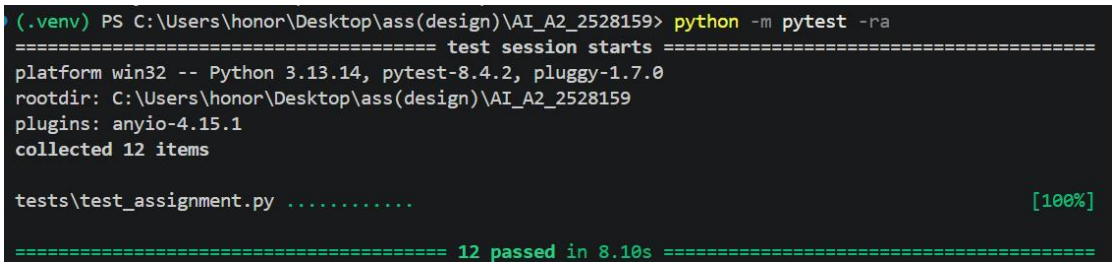

Command used:

```
python -m pytest -q
```

Recorded result: 12 passed, 1 warning.

The tests checked the system's prediction and validation behavior. The test suite should also cover invalid inputs, reproducibility and API responses.

Conclusion: The recorded test run passed all 12 tests. The warning should be reviewed before final submission.

And after I checked and I remove the warning. Now we have only 12 passed with no warning.
